

Technology Camp

2017

sponsored by

OYSTERS & PEARLS - UGANDA
CULTIVATING EDUCATION & TECHNOLOGY

Residential program for beginners and advanced students (P7-S6 finishers) to have hands-on access to robotics, drones, video game design, arts & crafts, and to experience Virtual Reality using Oculus and HTC Vive. All students will participate in sports and art programs.

The Program

Students design and prototype solutions to today's problems such as climate change, access to clean water, using automation to monitor systems and collect data. In video game design, students will design a game for competitive play. Lastly students explore strategies to bring their designs to the marketplace.

Please see website for program details and requirements.

Registration fee of 40,000 is all inclusive of room, board, materials and certificate.
